THE ROAD

The records show that 25 per cent of road accidents are due to poor eyesight. These who do much driving should be watchful of their eyes. When doing the roads at 35 miles there's always an unconsclous eyestrain. It being necessary for the driver to on the instant judge objects and distances correctly, the eyes must be kept FIT.

The best insurance against accident in transit, or in traffic jams, is to have your eyes examined by a RELIABLE OPTOMETRIST.

Correctly FITTED lenses are the only safe investment.
